China’s quest

John Garver’s China’s Quest is a major addition to the literature covering the People’s Republic of China’s (PRC’s) diplomatic history. Until now there has been no comprehensive single volume text on the topic in English, and Garver is exceptionally qualified for this project, having published books on China’s relations with the United States, Union of Soviet Socialist Republics, Iran, Taiwan, the Middle East, and India. In this book the focus is on China’s relations with the five major Asian powers: the USSR/Russian Federation, Japan, India, Iran, and the United States. His conceptual theme is the connection between domestic and international pressures that drive the PRC’s foreign relations. This is one of the most important features of this book; too often analysis of international relations ignores what is happening inside a state, focusing instead on geopolitical concerns. Garver’s approach gives equal weight to both, and his history is the stronger for it.

Jonathan Fulton

A historical atlas of Tibet

Karl Ryavec’s book is a remarkable addition to the study of Tibet; more a cartographic history in fact than a historical atlas. For what Ryavec manages to do, far more than simply to present historical information in a series of maps, is to offer a new kind of history of the Tibetan plateau, a new way of understanding the landscape and the people who inhabit it.
