CHINA'S RELATIONS WITH AFRICAN NATIONS have changed dramatically over the last decade. This is not just because of China, but because of the broader geopolitical context. Yet these developments are bringing challenges, not only for the West but also for China. This book examines these challenges, considering Africa as a growing ground, both for China and other global players, and for African governments. The result is a discussion of how these changes impact China, Africa, and the West.

In the thirty years after 1979, the Dutch East Indies ceased to exist and Indonesia's independence was recognized by the United Nations. The 1950s and 1960s saw a surge of national movements against a backdrop of mounting African expectations, causing Western withdrawals from the continent. In this context, China could assert its position as a new global player.
