The Place-makers

Just saying that we should pay closer attention to the context, learned and what I was teaching was rather abstract. I am not theory at several universities in Jakarta and Bandung, including Amsterdam, I left for Indonesia and I started lecturing political 3. In 2003, right after my graduation from the University of and the role of, artist initiatives in public space at Arte-Polis 2. And in 2010, the School of Fine Art and Design (in 2010); and professor Nezar above-mentioned professor emeritus Dorodjatun Kuntjoro-Jakti (in 2006), above-mentioned Charles Landry (in 2008); professor Eku Wand from Braunschweig University of Art in Germany, which collaborates with ITB’s (ITB), Indonesia, took over the organization of the biannual conferences. 5 The ITB alumnus and architect Ridwan Kamil, Polis, and up to today it still organizes the Young Creative Entre-preneur awards. 5 The ITB alumnus and architect Ridwan Kamil, founder of Urbane, 6 was the 2006 winner. Some of the keynote speakers at previous Arte-Polis editions were professor emeritus Alexander Cuthbert from the University of North South Wales (in 2006); former Coordinating Minister for Economic Affairs (president between the declaration of independence in 1945 and his ousting in 1966) and Habibie (president between the ousting of Soeharto in 1998, to which many ITB students contributed with their protests – and the first post-Soeharto elections in 1999). Many ITB lecturers – who are civil servants if they have a permanent contract – work as consultants to the state and its central and local governments. The Indonesian state has had for decades a strong top-down developmentalist approach to modernize the economy, and the Arte-Polis conferences are an attempt to change this story. It therefore comes as no surprise that ministers are invited to deliver keynote speeches.

Arte-Polis aims “to bring together and to connect practitioners, academics, artists, community leaders, local government officials, policy-makers and other professionals from diverse disciplines and regions around the world concerned with the quality of life and collaborative nature of creative communities […]. Its objective is to share and learn from international and local experiences regarding current issues, best practices and policy implications of creative connectivity on place-making.” 1

I should start with a disclaimer though; in 2008, I presented a paper at one of the parallel sessions at Arte-Polis 2. And in 2010, I organized a roundtable discussion on the political nature of, and the role of, artist initiatives in public space at Arte-Polis 3. In 2003, right after my graduation from the University of Amsterdam, I left for Indonesia and I started lecturing political theory at several universities in jakarta and Bandung, including ITB. Very soon, however, I came to realize that what I had learned and what I was teaching was rather abstract. I am not just saying that we should pay closer attention to the context, and the creative class. Researcher and consultant Richard Florida has done much to popularize the concept of the creative class, and Charles Landry for the concept of the creative city. 2 And theirs is a global appeal; Arte-Polis 1 was organized in 2006 by the Department of Architecture, and in 2008, the School of Architecture, Planning and Policy Development (SAPD/SAPPK) at the Institute of Technology Bandung (ITB), Indonesia, took over the organization of the biannual conferences.

Spaces and places frame life; furthermore, the ways we use these spaces and places are framed by the ways we talk about them: scientifically, aesthetically, morally, politically, economically, etc. When the stories we tell, and are being told, about our cities gain a sense of inevitability they become oppressing. There always are – and should be – alternative points of view. The last decade or so, the dominant theme has been creativity: the creative city, creative economy or industry for example, social behavior and the particularities of the political economy, which is too often overlooked in the ‘third wave’ literature, for example, it seems as if transition is an irreversible process from A to B if a country constructs the right institutions. 3 In one of my classes I attempted with my students to accomplish the meeting of Indonesia’s national political philosophy Pancasila and the political theories of John Rawls, Richard Rorty and others. 1 It was, however, not so much the local context I was missing, but the spatial component of public space in the writings of Rawls, Rorty and others. I am not saying that these theorists are too blame for this omission – some things need to be omitted to keep writings readable – but for me it meant a spatial turn, a turn to the writings of urban geographers and architects. So it was only natural for me to gravitate towards ITB’s Arte-Polis conferences.

Conference program

The British Council supported the second edition of Arte-Polis, and up to today it still organizes the Young Creative Entrepreneur awards. 1 The ITB alumnus and architect Ridwan Kamil, founder of Urbane, 2 was the 2006 winner. Some of the keynote speakers at previous Arte-Polis editions were professor emeritus Alexander Cuthbert from the University of North South Wales (in 2006); former Coordinating Minister for Economic Affairs professor Dorodjatun Kuntjoro-Jakti (in 2006), above-mentioned Charles Landry (in 2008), professor Eku Wand from Braunschweig University of Art in Germany, which collaborates with ITB’s School of Fine Art and Design (in 2010); and professor Nizar Alsayyad from the University of California in Berkeley, from which Ridwan Kamil is an alumnus (also in 2010).

The danger of flying in well-known speakers from abroad is that their talks can be rather broad with little relationship to Indonesia. While Eku Wand’s talk showed in a very entertaining way how interactive design could work, Charles Landry’s talk discussed case studies of place-making in the UK from which it was difficult to distillate possible implications for the Indonesian situation. In 2006, 2008 and 2012, the conference was organized at the ITB campus. In 2010, Arte-Polis 3 was organized in The Asia Africa Conference Museum, this museum commemorates the meeting of newly independent and non-aligned countries from Asia and Africa in 1955. This location was chosen to promote a different side of Bandung, as the center of the city has slowly moved...
northwards. Interestingly, when a representative of the museum opened Arte-Polis, no reference was made to the colonial use of the building, this art deco-styled building used to house Sociëteit Concordia, a club for plantation owners.7

In 2012, when Arte-Polis moved back to the campus, the conference had around a hundred speakers from over fifteen different countries, which made it smaller than the previous edition, which was a blessing in disguise as there are only so many presentations one can attend. However, if Arte-Polis is about exchanging best experiences then it is unfortunate that previous successful program elements were not repeated this time around; this time there was no art exhibition as was the case in 2006 (ITB has an on campus art gallery: Gallery Soemarjard). No site specific projects (in 2008 ‘Reclaiming Lost Space’ under the Pasopati Flyover, which is at walking distance from the campus), and no roundtable discussions (of which I organized one in 2010). The roundtable discussions were particularly missed as these offer an opportunity to interact and discuss on a more fruitful level than a short question and answer session after a presentation can provide.

Smart cities

Every few years or so new buzz words and lingo surfaces. This time around it was ‘smart’: smart cities, smart design and smart thinking. One of the two workshops was titled Smart Growth Workshop. And the first keynote speaker, professor Ulrich Weiseberg from HPI School of Design Thinking (Potsdam, Germany), spoke about smart design and thinking. In his talk, which seemed a bit like a PR pitch to start a franchise of his institute in Indonesia, he explained that smart design and thinking focuses on multidisciplinary collaboration and co-production; he gave Wikipedia as an example.4 Due to a generally strong social conformism, Indonesia could perhaps use a more individualistic spirit to achieve new ideas. However, just as with ‘creative’ cities, how are cities ‘smart’—is that not a human attribute?

By far the most inspiring presentation was by the second keynote speaker, Anies Baswedan, the rector of Paramadina University in Jakarta, which was founded by Muslim intellectuals Nurcholish Madjid. Anies Baswedan stated that Asia is re-emerging, but that at the very same time there are many social ill that cannot all be solved by a top-down approach, even though it is our natural response to look at the state for action to deal with social problems. He tested this by asking the audience whether it is possible to deal with the narcotics in Jakarta. And the general consensus was that it is the state’s responsibility. However, it is our garbage that fills up and blocks the sewer system, the rivers and canals. He told us not to wait for the government to step in just because we pay taxes. He continued to speak about a project he founded, Indonesian Mepojo (‘Indonesian Teachers’), which deals with the very uneven distribution of high-quality teachers. 5 University graduates who participate in the Indonesian Mepojo project are sent to remote areas to teach for a year; it is not considered an alternative career path, as the pay as a teacher is not higher, but it is seen as a rewarding civic duty. This project, Anies Baswedan hopes, is to become a hub of trust (littering and tax evasion are only two of the many signs that social trust has eroded in Indonesia) so that the fifth pillar of Pancasila becomes a reality: social justice.

Creative for everyone

Kathleen Aziz, from Co-library in Surabaya and one of the parallel sessions speakers,9 stated: “If the concept [of the creative city] is truly about empowering, unleashing potential, turning potential into something; then the concept should not only be applied to a few—the lucky few cities—and we could add to her plea: it should not only benefit one class—the so-called creative class—within these cities. This brings us back to Richard Florida, his methods, categories and findings have been widely criticized. And yet, the impact of his writings and talks is enormous. If we speak in terms of class, as Florida does, we also have to speak in terms of class interests, for which members need to recognize themselves as a class to be able to lobby for their interests.” Florida describes ‘creativity as an economic force’,10 and even if creativity, as Florida understands it, increases GDP and even if government policies to support the creative class (subsidies and easier permits for members of the creative class) help to increase GDP, it doesn’t say anything about its distribution. And how sustainable are such policies if it leads to increased concentration that everyone can be creative and that this potential should be used—who can argue against creativity?—but that contradicts the notion of classes and classes as enemies, I hope that somehow the gains of creativity will trickle down.

And because every one can potentially be creative, creativity is a great lobby argument. The danger, though, is that policies aimed at the creative class further increases inequality, and not only in terms of wealth distribution, but also in terms of access to space. The danger for example, is that we might be evicted to make room for members of the creative class and their interests.11 Many families were evicted from the center of Bandung, for example, to make room for a shopping mall and the above-mentioned flyover.12 Once more, I am obviously not against creativity, but that should not warrant another blow to the fragile state of solidarity in Indonesia. And to merely state that the urban poor are capable of creativity and also have the right to the city isn’t enough,13 it will require building bridges as Anies Baswedan would have it.

Roy Voragen is a Bandung-based writer and founder of Roma Arts, he can be contacted at http://fatumbrutum.blogspot.com.

Notes

4 The five basic principles of Indonesia’s state ideology: the belief in one God, just and civilized humanity; the unity of the Republic of Indonesia; democracy guided by the wisdom of representative deliberation; and social justice for all. At first, my students responded with confusion to my proposal to interpret these state philosophies as they have come to Pencahda as a propaganda tool.

14 And if we speak in terms of class interests, we also have to speak in terms of class conflicts—which only occurs below the radar in Indonesia, as it became a taboo after the elimination of the communist party in 1965-1966.
15 Richard Florida. 2012. ‘The Rise of the Creative Class, Revised’, The Atlantic, 25 June 2012. tinyurl.com/6gip6ahp (accessed 13 July 2012). In the same essay heweepingly writes: “The Creative Class has become truly global, numbering between one-third to nearly one-half of the workforce in the advanced nations of North America, Europe, Asia, and around the world.” That is for sure not the case in Indonesia (but I will use the term creative class for reasons of brevity). Furthermore, he refers to the political scientist Ronald Inglehart and his concept of the ‘post-materialist values’, but it is highly questionable whether Inglehart’s studies can be generalized to Indonesia.
16 The academic term for this process is gentrification; Belgian artist Reinart Vanhoe calls this the colonisation of the city, which leads to a populist backlash. Reinart Vanhoe. 2007. ‘A Pa for an Urbanist’, Bijdragen tot de Taal-, Land- en Volkenkunde 163:239-249. You can find this on Internet at Holopon, Metropoli M no.1; tinyurl.com/crphf5 (accessed 15 July 2012).
18 Dr. Tita Lavastgi and her student Prananda Luthyamaha Malasan presented a project, which they claim, reclaims the street. However, it is one thing to criticize the middle class’ spending too much time in shopping malls, it is an altogether different matter to claim that the streets are vacant. http://keunenbdg.com.
